Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by CN 2129132.

Figure 2 shows a portable vacuum cleaner comprising a shell 1, an electric motor 5, an impeller 3 in drive connection with the motor, an airtight loop existing between front cover 19 and shell 1, a filter 16, a suction nozzle 21, an elongated thin pipe 20, a disassembling connection (not numbered) provided on each end of pipe 20, a head lamp 17, a brush 22, a power cord 12.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 1744

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over CN 2129132 in view of US publication 2003/0014831 to Ma (Ma).

The CN patent does not show a hanging loop. The publication to Ma shows a hand-held vacuum comprising a handle in the form of a loop 214 positioned above the power cord 226. Accordingly, it would have been obvious to one skilled in the art to provide the handle and power cord arrangement as shown in Ma for the purpose of providing structure to hand the cleaner in the hand-held vacuum in the CN patent.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over CN 2129132 in view of CN 25048859.

The CN 2129132 patent is silent as to a USB connection. The CN 2504859 patent shows a USB power connection for connecting a cell phone to a computer power source. Accordingly, it would have been obvious to one skilled in the art to provide the USB power connection in the CN 2504589 patent into the vacuum in the interest of providing an alternative power connection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A. Redding whose telephone number is 571-272-1276. The examiner can normally be reached on Mon.-Fri. 6:00 - 3:00.
